

## **Lindsey A. Wood, Ph.D.**

Health Scientist

### **Summary of Experience**

Dr. Lindsey A. Wood is an environmental and occupational epidemiologist with 6 years of experience in epidemiological methods, statistical analysis, and human health risk assessment. She earned a BS in Pre-Health Biology with a minor in Chemistry, and an MS and PhD in Epidemiology. Her graduate work focused on environmental noise exposure in relation to cognitive outcomes in children and mental health outcomes in adults. She was also active in the design of a non-randomized cohort study aimed to assess the association between neighborhood greenness and cardiovascular outcomes. Additionally, Dr. Wood performed data collection and analysis for several cross-sectional studies regarding the use and perceptions of electronic nicotine delivery systems (ENDS). In her consulting experience, Dr. Wood applies epidemiological concepts and methods to explore human health risks from environmental, occupational, and consumer product exposures. Specifically, she has experience evaluating a variety of clinical and behavioral health outcomes in relation to asbestos, talc, lead, radiation, polycyclic aromatic hydrocarbons (PAHs), and nicotine products. Dr. Wood is skilled in literature review, epidemiologic study design, the collection of human health and environmental exposure data, and spatial and statistical analysis. Dr. Wood has published over 55 abstracts and peer-reviewed papers on various occupational and environmental exposures and risk-related topics.

### **Education**

Bachelor of Sciences (B.S.), Pre-Health Biology, 2017, Southern Arkansas University

Master of Science (M.S.), Epidemiology, 2019, University of Louisville

Doctor of Philosophy (Ph.D.), Epidemiology, 2022, University of Louisville

## **Project Experience**

### **Epidemiology and Statistical Analysis**

Conducted a literature review to estimate the number of reported cases of malignant mesothelioma of the tunica vaginalis of the testis and other para-testicular mesotheliomas, as well as performed statistical analyses to assess their associations with asbestos exposure, talcum powder exposure, and other risk factors.

Assisted in conducting an ongoing ENDS randomized controlled trial (RCT) regarding e-liquid flavorants and cessation of combustible cigarette smoking, managed data, and performed various statistical analyses throughout the trial.

Performed a systematic literature review and meta-analysis of occupational asbestos exposure and risk of laryngeal cancer and risk of head and neck cancers, stratified by fiber type.

Collected 24-hour environmental noise exposure data in Louisville, KY and modeled the spatial noise distribution for various time-periods using land use regression methodology.

Conducted data linkage of various population health data sets with environmental noise data and modeled the ecological association between environmental noise exposure with the distribution of standardized testing scores of elementary schools and with adult mental ill-health prevalence using linear regression, as well as the individual-level association between environmental noise exposure and odds of depression using logistic regression.

Collected primary health data of participants in a non-randomized clinical trial assessing environmental community health. Performed various statistical analyses to determine the associations between time spent outdoors and sleep, between views of greenness and depression, and between perceived neighborhood safety and cardiovascular disease.

Collected longitudinal primary health and fertility data of participants in a prospective cohort study assessing fertility and fecundability outcomes in women being treated for fertility issues. Performed several logistic regression models and Cox proportional hazards models to determine the probability of conception after fertility counseling and to assess the effects of history of sexually transmitted infections on likelihood of conception and the time to conception.

Provided emergency response for an Epi-Aid coordinated by the Centers for Disease Control and Prevention (CDC) and the Kentucky Department for Public Health. Conducted interviews with community members and first responders regarding their exposures and health outcomes following a natural gas pipeline explosion in rural Kentucky.

Served as a case investigator during the COVID-19 pandemic response conducted by Louisville Metro Public Health and Wellness. Contacted newly reported cases of COVID-19, collected relevant health and travel data from cases, matched data from health facilities, and reported all confirmed cases to the CDC.

### **Regulatory Support**

Contributed to multi-interdisciplinary research teams to evaluate pharmacokinetic, human factors, and label comprehension studies regarding nicotine and tobacco products, as well as tobacco product perception and intention surveys, all of which have been subject to multiple premarket tobacco applications (PMTAs) of e-liquids and oral nicotine products for the US Food and Drug Administration (FDA) Center of Tobacco Products (CTP).

Aided in a critical state-of-the-science evaluation of modern oral nicotine pouches, including review of abuse liability and topography, short- and long-term health effects, biomarkers of exposure and harm, product use behaviors and patterns (e.g., initiation, switching, cessation, and current use frequency), product perception and intentions, prevalence of use, and population modeling.

Assisted with clinical study, research strategy oversight, and statistical analysis of randomized controlled trials and prepared submission documents for companies submitting PMTAs to FDA CTP for their ENDS and oral nicotine products.

### **Litigation Support**

Managed and provided litigation support to testifying expert witnesses on personal injury cases related to alleged exposures to cosmetic talcum powder products, including baby, body, and foot powders and make-up products. Reviewed and interpreted relevant asbestos and talc epidemiological literature and case-specific materials for use in the preparation of expert reports and testimony. Performed comprehensive reviews and summaries of relevant plaintiff and expert testimony and other applicable case materials.

Managed and provided support, including performing spatial and statistical analyses, to testifying expert witnesses on class action and Bellwether cases regarding alleged exposures to ionizing radiation.

Provided litigation support to testifying expert witnesses on personal injury cases related to alleged exposures to asbestos from automotive friction products and gaskets and packing.

Provided litigation support for expert witness testimony related to a patent infringement case of electronic nicotine delivery systems (ENDS) products.

Conducted literature reviews and performed spatial analysis in support of expert witness testimony regarding class action and Bellwether cases of environmental and para-occupational exposures to lead.

Performed spatial analysis of dioxins and PAHs in air and soil sampling from a train derailment and assisted in the interpretation of the analysis in support of expert witness testimony.

### **Research Translation and Community Engagement**

Created guidelines and protocols to reflect government recommendations regarding the ever-changing status of the COVID-19 pandemic for television, film, and media production and operations.

Developed and employed multiple methods of communication to promote the increasing of awareness among affected communities on exposure risk to VOCs from a Superfund site and its potential cardiometabolic health effects. Translated study findings to affected communities and stakeholders.

For an environmental community health study, participated in all phases of community engagement, collaborated with project partners and research team leads, facilitated relationships with community members and organizations, built ongoing relationships for the multiyear project, led community meetings and presentations, and recruited and retained study participants through several novel methods.

For a research center aiming to better understand the youth perspective on anti-vaping campaigns with a long-term goal of implementing anti-vaping initiatives led by a youth advisory

council, participated in youth advisory council engagement and research translation of the vaping epidemic among youth, led discussions with the youth advisory council and translated the youth perspective to leading researchers, and mentored the youth advisory council in building anti-vaping campaigns targeted towards youth.

## **Professional Experience**

### **Health Scientist, Valeo Sciences LLC, February 2024 – Present**

Evaluate the epidemiology, health, and safety of chemical, physical, and biological hazards in a range of human exposure settings, including environmental, occupational, and consumer. Serves as a technical project manager on several multi-disciplinary research teams involving epidemiology, chemistry, toxicology, exposure science, behavioral science, and risk assessment to address complex questions about human health and safety.

### **Health Scientist II, Stantec ChemRisk (Formerly Cardno ChemRisk and ChemRisk), January 2024 – February 2024**

Provided consulting services specializing in environmental and occupational epidemiology and statistical and spatial analysis involving issues associated with the health effects of exposure to a variety of exposures, including asbestos, talc, lead, radiation, nicotine and tobacco use, flavorants for ENDS products, dioxins, PAHs, styrene, tailpipe emissions, polyvinyl chloride, diacetyl, and indoor air quality. Managed inter-disciplinary research teams involved in the preparation of expert reports, testimony and support. Contributed to technical excellence in the preparation of expert reports, testimony and support.

### **Health Scientist I, Stantec ChemRisk (Formerly Cardno ChemRisk and ChemRisk), September 2022 – January 2024**

Provided consulting services specializing in environmental and occupational epidemiology and statistical and spatial analysis involving issues associated with the health effects of exposure to a variety of exposures, including asbestos, talc, lead, radiation, nicotine and tobacco use, flavorants for ENDS products, dioxins, PAHs, styrene, tailpipe emissions, and diacetyl. Contributed to technical excellence in the preparation of expert reports, testimony and support.

### **Graduate Research Assistant – Superfund Trainee, University of Louisville Superfund Research Center, Envirome Institute, Department of Communication, Department of Epidemiology and Population Health, and School of Medicine, April 2018 – August 2022**

**Grant:** Srivastava, S. (PI), Bhatnagar, A. (Co-I), Heberle, L. (Co-I), O'Toole, T. (Co-I), McClain, C. J. (Co-I), Nantz M. H. (Co-I), Rai, S. N. (Co-I), Turner, J. R. (Co-I), Hein, D. (Co-I) et al. Superfund Research Center (Environmental Exposure and Metabolic Disease). National Institute of Environmental Health Sciences; \$7,280,928 for 2017-2021.

Provided research support for the University of Louisville's Superfund Project 1 – VOCs and cardiometabolic disease, an environmental health study aimed to evaluate the effects of VOCs on various adverse human health outcomes in communities surrounding a Superfund site in Louisville, KY. Assisted with health study data collection, including survey design and administration, consenting participants, and data entry. Supported participant recruitment via community events and door-to-door initiatives. Assisted with communication of study findings to stakeholder groups and developed and employed multiple methods of communicating information.

**Graduate Research Assistant, University of Louisville Envirome Institute, Department of Communication, Department of Epidemiology and Population Health, and School of Medicine, and Green Heart Louisville, April 2018 – August 2022**

**Grant:** Bhatnagar, A. (PI), Keith, R. (Co-I), DeFilippis, A. (Co-I), O'Toole, T. (Co-I), Hart, J. L. (Co-I), Walker, K. L. (Co-I), et al. Green Heart Louisville (Urban Greenness and Cardiovascular Health). National Institute of Environmental Health Sciences; \$2,614,648 for 2018-2023.

Provided research support for the Green Heart Louisville project, a non-randomized clinical trial and environmental community health study examining the associations of community greenness, air quality, and other environmental factors with many facets of human health. Participated in all phases of community engagement, collaborated with project partners and research team leads, facilitated relationships with community members and organizations, built ongoing relationships for multiyear projects, led community meetings and presentations, assisted in primary health data collection of participants in person at several study visits, and recruited and retained study participants through several novel methods.

**Graduate Research Assistant, American Heart Association VAPERACE Center and University of Louisville Department of Communication, Department of Epidemiology and Population Health, and School of Medicine, August 2020 – August 2022**

**Grant:** Hamburg, N., Wu, J., Blaha, M. (PIs), et al. Rapidly Advancing Discovery to Arrest the Outbreak of Youth Vaping (VAPERACE). (Hart and Walker, PIs, Community Engagement and Research Translation Core; Hart and Walker, Co-Is, Project 3—Cessation of Nicotine Vaping in Youth). American Heart Association; \$6,650,000 for 2020-2022.

Provided research support for the American Heart Association's VAPERACE Center, a research center aiming to better understand the youth perspective on anti-vaping campaigns with a long-term goal of implementing anti-vaping initiatives led by the Youth Advisory Council (YAC). Participated in YAC engagement and research translation of the vaping epidemic among youth. Led discussions with the YAC and translated the youth perspective to leading researchers. Assisted the YAC in building anti-vaping campaigns targeted towards youth. Managed and created content for all VAPERACE social media accounts.

**Field Researcher, Goodman Research Group and The National Aeronautics and Space Administration (NASA), February 2020 – April 2020**

Provided research support for NASA's Discover Exoplanets, an interactive community exhibit designed to educate children and adults on exoplanets. Surveyed visitors on their enjoyment and general feelings towards the exhibit, conducted observations on interactions with the exhibit, and reported data to help NASA understand community engagement with the exhibit.

**Graduate Research Volunteer, University of Louisville Department of Epidemiology and Population Health, August 2018 – August 2019**

Provided research support for the Louisville Tobacco Smoke Exposure, Genetic Susceptibility, and Infertility (LOUSSI) study, a prospective and clinical-based study assessing the relationship between NAT2 acetylase type, smoking status, and fertility outcomes. Assisted in primary data collection of 6 month follow up via phone and email, created data sets, and analyzed data.

**Professional Membership and Service**

- Society for Epidemiologic Research (SER)

- International Society for Environmental Epidemiology (ISEE)
- Kentucky Public Health Association (KPHA)

### Professional Honors and Awards

- Recipient of the “Outstanding Student Epidemiology Poster” Award at the Kentucky Public Health Association Annual Conference for Modification of the relationship between environmental noise and prevalence of mental ill-health by neighborhood income and race in Louisville, Kentucky. 2022
- Recipient of the “Outstanding Response as a member of the 2019 Lincoln County Pipeline Explosion CDC Interview Team” Award from the Medical Reserve Corps, Kentucky Department of Public Health, and the Centers for Disease Control and Prevention for Public Health Emergency Preparedness and Response. 2019.

### Trainings and Continued Education

- Inter-university Consortium for Political and Social Research Summer Program (ICPSR)
  - The Population Assessment of Tobacco and Health (PATH) Study Data User Workshop, July 29-30, 2024
- Society for Epidemiologic Research (SER)
  - Intro to Spatial Analysis & GIS for Spatial Epidemiology in R, June 14, 2022
  - An Introduction to R for Epidemiologists, May 13, 2022
- Quality Matters
  - Applying the QM Rubric (APPQMR), February 3, 2022
- Texas A&M Superfund Research Center
  - Disaster Research Training Workshop, December 17-18, 2018
- Texas A&M Engineering Extension Service in cooperation with the Department of Homeland Security
  - FEMA: AWR-160-W WMD/Terrorism Awareness for Emergency Responders, October 15, 2018
- U.S. Department of Homeland Security
  - FEMA: IS-00800.c National Response Framework, An Introduction, October 8, 2018
  - FEMA: IS-00200.b ICS for Single Resources and Initial Action Incident, ICS-200, October 8, 2018
  - FEMA: IS-00100.c Introduction to Incident Command System, ICS-100, August 10, 2018
  - FEMA: IS-00700.a National Incident Management System (NIMS) And Introduction, October 31, 2017
- QPR Institute
  - QPR Suicide Prevention Gatekeeper Certificate, September 9-15, 2018.
